TROMB

Quality, Containment & Performance – All in one.

DC Tromb Turbo

- Powerful three-phase turbo motor.
- Thermal protector that activates at high temperatures.
- Easier filter change procedure.
- Tall cyclone & sturdy chassis.
- Quick coupling for filter change.
- Equipped with a Hepa H13 and a washable polyester filter.
- Semi automatic filter cleaning.

The DC Tromb Turbo

We have launched three powerful dust free solutions

The DC Tromb Turbo with direct start is a medium sized dust extractor that expands the Tromb family. It is equipped with a powerful three-phase turbo motor which is suitable for heavy cleaning (38 mm/1.5" accessories) and is delivered with 7 m hose. Suitable for source extraction from medium sized power tools such as grinders, jack hammers and saws. Thanks to the tall cyclone, large filters and powerful motor package, it can handle large amounts of debris. You have three options for a collection container: A (steel container), C (plastic bag) or L (Longopac).

The DC Tromb Turbo is also available with a frequency inverter (VFD). This model gives 50% more Hepa filter area than its predecessor. You are now able to customise the machine for a variety of tasks: From dust removal during polishing of glassfibre, carbon fibre and epoxy with a hand-held sander – to dust removal for larger floor grinding. New safety features such as overheating protection is added. With the semi automatic filter cleaning and quick coupling for filter change, this machine gets the job done. Select between a steel container, plastic bag or a Longopac bag.

Ex **The DC Tromb Turbo EX for ATEX zone 22.** This is a medium sized dust extractor that expands the Tromb Family. It is equipped with a powerful three-phase turbo motor suitable for heavy cleaning (38 mm/1.5" accessories) and is delivered with 7 m hose. It is certified to IP65 standard, ATEX zone 22 (conductive dust). Our DC Tromb Turbo Ex is equipped with a steel collection container.
